

BROTHER AIRFLOW 3000

ELECTRONIC AIR THREADING TECHNOLOGY

Simply insert your thread into the threading hole and 'whoosh' the air system guides it through the loopers for you.

2, 3 OR 4 THREAD STITCHING AND 7 DISTINCT FINISHES

Choose between 4 thread overlock, 3 thread overlock narrow, 3 thread overlock wide, flat lock 2 thread, flat lock 3 thread, pin tuck, blind hem, rolled hem, narrow hem and lettuce edge.

DIFFERENTIAL FEED OF 0.7 TO 2MM

With a differential feed ratio of 0.7mm to 2mm you will get an outstanding stitch quality, no matter what fabric you're working on.

QUICK CHANGE LEVERS

Keep the flow going with quick release levers for rolled hemming and deactivating the cutting knife.

ERROR LED LIGHT AND SAFETY STOP MECHANISM

Cover open? Raised presser foot? The machine won't start! As an extra precaution, the safety sensor deactivates the cutting knife immediately, keeping you safe and protecting the loopers.

BRIGHTLY LIT WORK AREA

See your work properly with the bright LED lights. Makes working with darker coloured materials much easier and means you can work at any time of the day or night.

GREAT FOR CHALLENGING MATERIALS

Excellent for adding professional finishing touches on fine knits and stretchy materials, which can be challenging on traditional sewing machines.
